

HikCentral Professional V3.0.0

HikCentral Professional is Hikvision's enterprise-grade security management platform, providing unified control over multi-system integration including video, access control, alarm detection, and more. Featuring an enhanced clustering architecture, HikCentral Professional delivers scalable high-performance solutions for large-scale deployments, ensuring operational continuity aligned with organizational growth.

Key Feature

Light and Efficient

- Lightweight architecture features reduce consumption of system resources
- Capable of managing multiple systems of varying sizes with consistent efficiency

Unified and Flexible

- Supports combining various application plug-ins under a unified, on-demand architecture for collaboration across business segments
- New plug-ins can be continuously developed to meet new business needs

Integrated and Open

- Compatible with virtually all Hikvision products and their abundance of applications, including deep-learning-based analytics and statistics
- Open architecture permits easy integration with third-party systems and hardware

• Features of Main Modules

Module	Features
Video	<ul style="list-style-type: none"> ● Efficient and comprehensive video security ● Quick incident search and location, convenient event search, and quick run-through of video ● Video export as evidence ● Low bandwidth network adaptability ● Reliable and flexible storage
Access Control	<ul style="list-style-type: none"> ● Comprehensive and flexible access management methods ● Advanced access strategies for sensitive areas ● Convenient employee badge design and printing ● Clear step-by-step guidance ● Remote personnel registration ● Automatically lock or unlock doors ● Keep doors in a remain unlocked status during an emergency ● Easily count and verify everyone's safety ● Opening door via Bluetooth and NFC
Visitor	<ul style="list-style-type: none"> ● Digitalized visitor management ● Visitor registration in advance ● Pre-defined access permissions and traceable records ● A Watchlist function along with personalized design and printing of badges
Vehicle	<ul style="list-style-type: none"> ● Flexible and efficient entrance & exit management ● Improved parking experience for drivers ● Self-service parking query ● Flexible billing ● Intuitive and efficient parking operation analysis and transaction analysis reports
On-Board Monitoring	<ul style="list-style-type: none"> ● Efficient vehicle monitoring for quick response ● Reliable archive management ● Customized reports for enhanced operational efficiency
Alarm Detection	<ul style="list-style-type: none"> ● Centrally manage various alarm sources ● Real-time display of all kinds of alarms ● Flexible linkage ● Automatic audio alarms
Intelligent Analysis	<ul style="list-style-type: none"> ● The video-based intelligent analysis dashboard enables flexible and extensible digital applications ● Smart commercial analyses
Commercial Display	<ul style="list-style-type: none"> ● Manage and configure content for digital signage in an intuitive manner ● Pre-installed program templates ● All programs are created visually
Time & Attendance	<ul style="list-style-type: none"> ● Flexible attendance rule-setting ● Diverse attendance reports and customizable templates ● Easy integration with third-party payroll systems ● Supports employees searching for attendance results and submitting applications for correction
Portable Enforcement	<ul style="list-style-type: none"> ● Quick retrieval of important recordings, long-term backups, and file-level permission management ● Automatic detection and addition of portable devices through dock stations, and detailed statistical logs for personnel and equipment use
Smart Wall	<ul style="list-style-type: none"> ● Display videos on the wall ● Video auto-switch and scheduled playback ● Alarm pop-up on smart wall. The alarm video will be automatically played in a pop-up window on the video wall to notify the operator
Parking Lot Management	<ul style="list-style-type: none"> ● Efficient entrance & exit management with access rules for vehicles, integration with ANPR cameras, and touch-free, non-stop vehicle authentication to help reduce rush hour

	<p>congestion</p> <ul style="list-style-type: none"> ● Improved parking experience with guidance screens and displays to find vacant spaces ● Flexible charging options including manual charge and prepayment
Evidence Management	<ul style="list-style-type: none"> ● Convenient information collection with multi-clients (Mobile Client, Web Client, Control Client) for uploading files ● Unified management of cross-service evidence files, including videos, pictures, audios, and documents uploading in the daily operation ● Long-term backup, efficient retrieval: evidence classification, archiving, retrieval, export, one-stop management
AR	<ul style="list-style-type: none"> ● Easily access key cameras without losing the global view ● Quick resource location through simple "Click" and "Filter" actions ● Efficient process for quick event handling from notification to acknowledgment
Patrol Management	<ul style="list-style-type: none"> ● Design patrol schedules and routes effortlessly using an intuitive e-map interface ● Security staff check in using access control devices with all data automatically uploaded to the software ● Report anomalies during the patrol to the center via the Mobile Client ● Trigger alarms instantly if unauthorized individuals attempt to conduct patrol ● Comprehensive patrol reports enable managers to assess performance effectively
Security Inspection	<ul style="list-style-type: none"> ● Identify a wide range of prohibited items timely and accurately, reducing labor costs and security threats ● Simplify centralized management with real-time detection results, alarm information, and live view
Emergency Mustering	<ul style="list-style-type: none"> ● Instant response to emergencies with a click to trigger the emergency automatically or manually ● Enhanced evacuation experience with cycled broadcast of evacuation messages through IP speakers and remaining doors open along the escape route for quick assembly at muster points ● Efficient confirmation of personnel safety status at muster points, including counting and verification of everyone's presence and checking the most recent locations of missing individuals
Remote Site Management (RSM)	<ul style="list-style-type: none"> ● Manage multi-site systems in one place, providing a unified view of different resources, and all related events and alarms across sites. ● Multi-site solutions in terms of the number of devices, remote sites and concurrent events to be handled by the system
Central Management	<ul style="list-style-type: none"> ● Build a scalable resource server cluster to achieve centralized management of large-scale resources on demand. ● Hot standby for taking over a failed sub server to ensure uninterrupted operation and prevent data loss in a cluster. ● Clustering of streaming servers to ensure high-concurrency streaming. ● Large-scale data storage. ● Provide visual server management with real-time monitoring of the Main Server, Resource Server clusters, Streaming Server clusters, and more.
Maintenance	<ul style="list-style-type: none"> ● Visualized network and device topology and alarm notifications ● Logs are available for event trackback and evidence ● Check all health status with one click or according to a preset schedule ● Clearly see the risks and exceptions

Software Specification

The following table shows the maximum performance of the SYS (System Management Server). For other detailed data and performance, refer to *Software Requirements and Performance*.

Multiple Servers (Cluster Mode)	
Type	Value
Resource Server Cluster	1
Sub Servers in a Resource Server Cluster	5
Standby Servers in a Resource Server Cluster	5
Streaming Server Cluster	1
Servers in a Streaming Server Cluster	32

Manageable Devices		
Type	Single Server	Multiple Servers
Encoding Devices	10,000 in Total Note: Up to 10,000 encoding devices, 5,000 access control devices, 5,000 elevator control devices, 30 security radars, 32 visitor terminals, 2,048 alarm devices (security control panels and panic alarm devices), 1,000 dock stations, 128 network transmission devices, 40 entrances&exits, 2,048 guidance terminals, 4 UVSSs, 2,048 commercial display devices (including digital signages, interactive flat panels, and LED controllers), 1,000 IP speakers, 2,048 fire protection devices, 1,000 scanning devices, 256 portable code scanners, and 100 payment terminals are allowed.	55,000 in Total Note: Supports up to 50,000 encoding devices on sub servers and 5,000 other devices on the main server. The performance of multi-server is tested with a 5-sub server cluster.
Encoding Devices Supporting ONVIF Protocol		
Access Control Devices		
Elevator Control Devices		
Video Intercom Devices		
Visitor Terminals		
Security Control Panels and Panic Alarm Devices		
IP Speakers / Amplifiers		
Query Terminals		
Guidance Terminals

System Requirement

* For high stability and good performance, the following system requirements must be met.

OS for HikCentral Professional Server	Microsoft® Windows 11 64-bit (including version 24H2) Microsoft® Windows 10 64-bit Microsoft® Windows Server 2019 64-bit Microsoft® Windows Server 2016 64-bit Microsoft® Windows Server 2012 R2 64-bit Microsoft® Windows Server 2012 64-bit Microsoft® Windows Server 2022 Microsoft® Windows Server 2025 <i>*For Windows Server 2012 R2, make sure it is installed with the rollup (KB2919355) updated in April, 2014.</i>
OS for Control Client	Microsoft® Windows 11 64-bit Microsoft® Windows 10 64-bit Microsoft® Windows Server 2019 64-bit Microsoft® Windows Server 2016 64-bit Microsoft® Windows Server 2012 R2 64-bit Microsoft® Windows Server 2012 64-bit Microsoft® Windows Server 2022 <i>*For Windows Server 2012 R2, make sure it is installed with the rollup (KB2919355) updated in April, 2014.</i>
Browser Version	Google Chrome® 125 and later Firefox® 125 and later Safari® 16.6 and later Microsoft® Edge 125 and later
Database	PostgreSQL V16.1
OS for Mobile Client	iOS 12.0+ Android 15.0+
Virtual Machine	VMware® ESXi™ 6.x, ESXi™ 7.x Microsoft® Hyper-V with Windows Server 2012/2012 R2/2016 (64-bit) <i>*The Control Client cannot run on the virtual machine.</i> <i>*Refer to the Deployment Guide of HikCentral Professional on VMware Virtual Machines for how the streaming server running on the virtual machine.</i> <i>*Virtual server migration is not supported.</i>

Recommended Hardware Specification

For Single Server

* Configuration 1: Suitable for scenarios with up to 3,000 channels. Configuration 2: Suitable for scenarios with up to 10,000 channels.

Feature	Configuration 1	Configuration 2
Suggested Hikvision Model	DS-VE11-R/HW1D	DS-VH22-R/HW2D
CPU	Intel® Xeon® E-2434	Intel® Xeon® Silver 4410T
RAM	16G*1	32G*1
HDD Type	2T 7.2K SATA HDD*2(RAID_1)	2TB 7.2K SATA*2(RAID_1)
Power Supply	600W(Dual power)	800W(Dual power)
Dimension (W × H × D)	482.0 mm × 42.8 mm × 598.9 mm (18.97" × 1.68" × 23.57")(2U)	482.0 mm × 86.8 mm × 721.62 mm (18.97" × 3.41" × 28.4")(2U)
Network Interface	1GbE*2	1GbE*6
Operating System	Microsoft Windows Server® 2019 Multilingual Version	Microsoft Windows Server® 2022 Multilingual Version

For Multiple Servers

* Suitable for scenarios with more than 10,000 channels. For sub or standby servers, you can choose Configuration 1 or Configuration 2 in the "For Single Server" table.

Feature	Main Server	Database Server
CPU	Intel® Xeon® Silver 4309Y*2	Intel® Xeon® Silver 4309Y*2
RAM	32G*2	32G*2
HDD Type	960G SATA SSD*2 (RAID1)	960GB SATA SSD*2 (RAID_1) / 3.84TB SATA SSD*4 (RAID_5)
Power Supply	800W	800W
Dimension (W × H × D)	482.0 mm × 42.8 mm × 748.79 mm (18.97" × 1.68" × 29.47") (1U)	482.0 mm × 42.8 mm × 748.79 mm (18.97" × 1.68" × 29.47") (1U)
Network Interface	1GbE*6	1GbE*6 + 10G SFP*2
Operating System	Microsoft Windows Server® 2022	Microsoft Windows Server® 2022
